

Yousuf Sultan

Lead Data Analyst · Analytics & BI Manager · Data-Driven Decision Leader

Hyderabad, India · Open to Remote & Hyderabad Hybrid · ysultankpg@gmail.com · +91 9739001239 · [linkedin.com/in/yousufkpg](https://www.linkedin.com/in/yousufkpg)

Professional Summary

Lead Data Analyst with **13+ years of experience** building enterprise-scale analytics, BI, and reporting platforms across technology, geospatial, and healthcare domains. Currently driving analytics strategy for **Apple Maps** (via Cognizant), managing a team of 8, and delivering Snowflake/Tableau solutions that process **10M+ records** and support **50+ stakeholders**. Beyond dashboards, I build the **automation layer that keeps analytics operations running** — Python-based pipeline monitoring, auto-escalation to Slack/email/Radar, and ticket-hygiene bots that eliminate manual triage. Proven track record of cutting reporting effort by 15+ hours/week, boosting dashboard performance by 50%, and leading legacy-to-cloud data migrations.

Impact at a Glance

8 Analysts led & mentored	20+ Executive dashboards owned	50+ Stakeholders supported
10M+ Records processed (Snowflake)	15+ Legacy pipelines migrated	50% Dashboard performance gain
15 hrs Reporting effort saved / week	30% Less data validation effort	29 Pipelines under auto-monitoring

Core Strengths

Snowflake	SQL	Python	Tableau
Power BI	KPI Development	Data Modeling & Warehousing	ETL Development
Analytics Leadership	Hiring & Interviewing	Stakeholder Management	Process Automation

Professional Experience

Lead Data Analyst — Cognizant (Client: Apple)

May 2022 – Present

Apple Maps Analytics · Hyderabad, India

- Lead analytics strategy for **Apple Maps** quality, productivity, throughput, and automation programs, serving as the primary analytics advisor to Product, Engineering, and Program leadership.
- Manage, mentor, and grow a team of **8 analysts**, owning hiring — including conducting technical interviews and driving analytics hiring decisions.

- Architect and scale **Snowflake-based analytics platforms** processing **10M+ records**, partnering with cross-functional stakeholders to define KPIs and reporting strategy.
- Led migration of **15+ legacy data pipelines** (Scala-based) to Snowflake, powering **20+ dashboards** used by **50+ stakeholders**.
- Automated manual reporting workflows, **saving ~15 hours/week** and **reducing data validation effort by 30%**.
- Improved dashboard refresh performance by **50%** through Snowflake workload optimization and query tuning.
- Own and maintain **20+ Tableau dashboards** spanning Automation Insights, Productivity, Throughput, Workforce Efficiency, and Operational Performance.

Automation & Tooling (Python) [SELF-INITIATED](#)

Cognizant / Apple Maps

Production-grade internal tooling built to eliminate manual monitoring & triage

- Built and operate a production **pipeline-monitoring system** (Python) tracking the health of **29 data pipelines** across 5 program areas, running on an automated schedule 5x/day.
- Engineered a fully automated **escalation workflow**: on critical failure, the system auto-creates and prioritizes a **P1 Radar ticket**, emails the stakeholder distribution list, and posts real-time alerts to Slack with the responsible owner auto-@mentioned — no human intervention required.
- Designed retry/round-tracking and recovery-detection logic to distinguish genuine failures from transient issues, cutting noisy/duplicate alerts.
- Built a second automation bot for **Radar ticket hygiene** — scans open tickets for missing required fields and auto-routes targeted email + Slack notifications to the correct owner.
- Integrated with Apple's internal **Kerberos/SPNego authentication** for secure, credential-free automation against Radar and internal APIs.
- Deployed both tools as scheduled, self-monitoring background jobs (Harbor / launchd) with state persistence to prevent duplicate alerts.

Senior Software Developer / BI Lead — IQVIA

Sep 2016 – May 2022

Healthcare Analytics Programs

- Led enterprise BI and reporting initiatives across healthcare analytics programs, managing **12+ BI applications** spanning Tableau, Power BI, and SSRS.
- Delivered scalable, business-critical reporting solutions used across planning, operations, and executive decision-making.
- Mentored analysts and developers, improving delivery quality, code standards, and dashboard adoption org-wide.
- Built Tableau dashboards and ETL pipelines end-to-end — from requirements gathering through production deployment.
- **Recognized with the IQVIA IMPACT Program Ovation Award (2022) and Spot Award (2016).**

Senior BI Developer | SQL BI Developer | Database Engineer

2013 – 2016

- Built data warehouse solutions, ETL pipelines, and Tableau dashboards supporting enterprise-wide analytics and reporting.

Technical Skills

Analytics & Visualization

Tableau, Power BI, SSRS, SSAS

Programming & Querying

SQL, Python, Spark (Scala)

Automation & Integration

Python scripting, Slack/Email API integration, Kerberos/SPNego auth, Radar API, Harbor/launchd scheduling

Data Platforms

Snowflake, SQL Server, Hive

Data Engineering

ETL Development, SSIS, Data Modeling, Data Warehousing

Leadership & Delivery

Team Management, Hiring & Interviewing, Stakeholder Management, Project Planning

Education, Certifications & Awards

Education

- B.Sc. Information Technology — Punjab Technical University

Certifications

- Snowflake — The Complete Masterclass
- Apache Spark with Scala
- Microsoft MTA: Database Fundamentals
- Tableau Training & Certification

Awards

- IQVIA IMPACT Program — Ovation Award (2022)
- IQVIA Spot Award (2016)

Target Roles: Lead Data Analyst · Principal Data Analyst · Analytics Lead · Business Intelligence Lead · Analytics Manager · Product Analytics Lead
